

ENTREPRENEURIAL SKILLS WHICH SHOULD BE TEACHING IN SCHOOLS

Dr. P. Sophiamesalina

Assistant Professor of Education, TCP

Abstract

This paper highlights the importance of entrepreneurship education for high school students and how this skill based education is utilized to develop interest among the children. Entrepreneurship allows students to learn more than just their chosen field of study and creates an interdisciplinary environment to work and develop in. Entrepreneurship education focus the program which teaches the crucial life skills that will help them to navigate in this uncertain future. These skills include problem solving, Team work, Empathy as well as Learning to accept failure as the part of the growth process. Here the author point out some strategies to the teachers which help them to use in the class rooms to encourage the lifelong entrepreneurial skills of their students.

Keywords: *Entrepreneurship education, entrepreneurial skills, strategies for the teachers.*

We, the teachers made it the priority to ensure our students, who were able to connect the information what they have learned in the class with the real world. If they couldnot, it doesnot mean their quality of education. Some of the strategies, lessons and activities may have considered as unnecessary by our colleagues and administrators related to the entrepreneurial skills. We must take it upon ourselves to make sure, we expose our students to the areas, such as entrepreneurship, innovation, problem solving and critical thinking. Entrepreneurial skills which teach us about money, investing, business Strategies, Savings, handling loans, economical benefit arrangements, prioritization of the needy and creating budgets. At the same time students can learn critical life skills such as problem solving, brain storming ideas, forwarding risks, facing failures, getting up again, setting goals, working together and feeling comfortable to work individually.

It is the teachers' job to introduce many unknown future job market for which the students can build for themselves. Allow them to shine within their given abilities and talents while adding in the business elements.

Objectives

- To find out the strategies which can train the students to develop the Entrepreneurial skills which may suits to become a good employee for all the jobs.
- To nature the individual as a beneficial member in his or her society.
- To develop the society in the domains of economy and maintain societal development.

Importance of Entrepreneurship Education

Studying entrepreneurship benefits the students and learners from different and economic background because it teaches people to cultivate unique skills and think outside the box. Moreover it creates opportunity, instills confidence, ensure social justice and estimate the economy.

Benefits of Entrepreneurship Education

It makes the students to learn the following

- How to collaborate and work with the Team
- To speak in Public
- To collect and analyze the data
- To use Social Media as an advocacy tool.
- To solve real and complex Problems
- To use curious , creative and Innovative approach to identify the problems

Why Entrepreneurship Education is important for Girls

Girls stand to gain most from it. The under representation of qualified women in leadership positions has created a Gender gap that exists in almost every industry. Entrepreneurship education lets girls to develop their skills, embrace their competitive side and learn to take more risk. It can be effective when practiced in a single sex class room setting which lets girls explore their interest and passions in an environment free from gender stereo type and social pressure. The advantages of learning these scales needed to start a business, which may be relevant to any field and be desirable attribute for being a good employee.

The Strategies which helps the teacher in her class rooms to encourage lifelong entrepreneurial skills**Brainwave box**

It can be an agitator for creating and sharing ideas in a safe place while encouraging critical thinking and problem solving skills. Set up a box in our class room for brain storming business ideas. We can use brain storm bins as a way to kick off the school year's most significant projects. Weekly once we can go through their ideas together. As a year progresses we can select one entrepreneurship goals that can guide them toward presenting their final projects at the end of the year.

Solvent Provider

It provides space to the students to find things to complain about in school and to come up with solution. Diving in to these solutions with the students' ideas can cultivate stronger relationships among students, teacher and management. It may boost their self-esteem and encourage problem-solving instead of complaining.

Business Mall Competition

We allow the students to watch the episodes or ideas, interviews of younger entrepreneur in the class rooms and discuss about them. Build “Business Mall “ competition at school or College. In addition to learning they can learn about investing, organizing, budgeting, purchasing, producing, marketing, delegating, decentralizing the work and offering services. Encourage the winners who earned more profit in that sales day.

Passion Driven Class Room

We can allow the students with the setting time table for an hour in which they may explore new things, take on a project or focus on areas outside of the class rooms they may want to discover. Our students may set back at the beginning because which may confuse them to think on their own rather than teachers telling them what to do. We can brainstorm the topics with them to get their imagination brewing. Prepare them to share their findings and development with other students and classes and even in digital venues. Teachers can act as a facilitator to ensure whether they start on task.

Personal Branding

It allows students to introduce themselves to the world and create a positive cybernetic foot print, which is becoming essential in pursuing business and employment opportunities. Creating a personal brand differentiate one from the crowd and allows her to display skills and proficient in the particular field. Entrepreneurship focused programs teach students crucial life skills that will help them to plot a route this uncertain future. These skills include problem solving, team work, empathy as well as learning to accept failure as a part of the growth process.

Problem identification Skills

Student needs to learn how to identify problems before they learn how to solve them. Entrepreneurship education teaches children to identify problems which they have been never encountered before. It is a skill that will be very useful in tomorrow's world. The teacher has to find some activities related to this and engage the children in identifying their own problems first.

Conclusion

Entrepreneurial education and training provide individual to recognize commercial opportunities, self-esteem, knowledge and skills to act on them. Entrepreneur traits are good for the life which is to be learned, followed and applied by each individual. It is unanimously felt that there is a greater need for growth of entrepreneurship in the state for its economic development. If the students lack enterprising and a deep sense of involvement, nothing can help them in the era of liberalization and globalization with the advancement of information technology. The educated youth of the state can make their presence felt in the field of industry &

business and can contribute towards nation's development. This can be done by a little self confidence and concerned efforts of school and higher education which may bring the attitude and values for the business or job.

If we, the teachers inculcate financial literacy, goal setting and planning, urge team work and bolster effective communicative skills at school level, the students will do any job in a remarked manner and may be a support giving person to society.
